PROFESSIONAL SUMMARY

I'm full of surprises, I go for the things which belongs to me. I work passionately for myself and trying to go for youth to let them understand the chances of being here. I myself excited for my expedition ahead. I'm serious type guy, serious for future and for family. I love to be in a circle which understands me and my thoughts of future planning. I take my stuff seriously and I try not to depend on anyone. Right now I'm a student, doing my B.E in Software Engineering. I started developing new Ideas of my own, though yet I'm not professional but also not a newbie too. So this was the little story of mine, hope you enjoyed it.
